TOKENLANDS Gameplay

Anyone with a WAX wallet can register for the TokenLands game and participate in the gameplay absolutely free. On the main page, you can see basic information about your account

Owner - shows sector owners how many staking slots they have and how many of them are full

War Power- shows how much military power your account has full

Staking Power - shows how many T-coins you receive per day for all your staked NFT cards

Balance - shows how many T-coins you have in your WAX wallet

Rewards - shows how many T-coins you can Claim from your staking NFT cards

To the right of the Avatar displays the **Resources** and their amount in your wallet, depending on the rarity.

The progress bar shows by how much your account is improved, which affects the number of mined T-coins when using the Work function. **Click the button «UP» to used Level-up NFT cards.**

When you hover over a continent, you get information about that continent.

Staking slot - shows how many places for staking cards on a given continent and how many of them are occupied.

Work - shows how many jobs are available on this continent within 24 hours and how many of them have already been completed.

War power - shows how much War power the players located on this continent have.

Mine - shows the total number of available resources per day on a given continent and how many of them have already been mined.

The selected continent is highlighted in green. Until the War begins in the game, movement across the continents will be free. When the War of continents begin you can change continent 1 time in 10 days.

First Steps

First of all, you must choose Continent and after that you can see Continent page:

On this page you can choose what you want to do:

Work - Absolutely free function - you go to work for 8 hours and get 0.3 T-coins for it. If you work in a sector other than yours, you will be charged a 10% sector owner commission.

If your account is improved you will receive more T-coins according to the percentage of your improvement. If you go to the work, you will not be able to mine during the time allotted to work - 8 hours

Mine - You go to mine a resource for 8 hours and must pay 3 T-coins to visit the mine. In return, you get a resource that is located on this continent. It will be displayed on the right side of the main panel. A combination of resource cards creates a mythical NFT card If you go to the mine, you will not be able to work during the time allotted to visit mine - 8 hours

Stake - This feature is for staking your NFT cards. You can stake as many cards as there are free stake slots in the sector.

For example: the common sector can hold 100 staking cards (stake limit is 100). 20 are already occupied (stake Counter 20). That means you can only stake 80 cards in this sector.

If you stake cards in a sector other than yours, you will be charged a 10% sector owner commission. Funds from staking cards will be displayed in the main panel in the section «Rewards». To credit these funds to your balance, you must click the button «Claim».

A filter is also available by the number of available work, the number of free slots for stake NFT and search name.

Move to Inventor for Activate Sector, Avatars and Unstake your NFT:
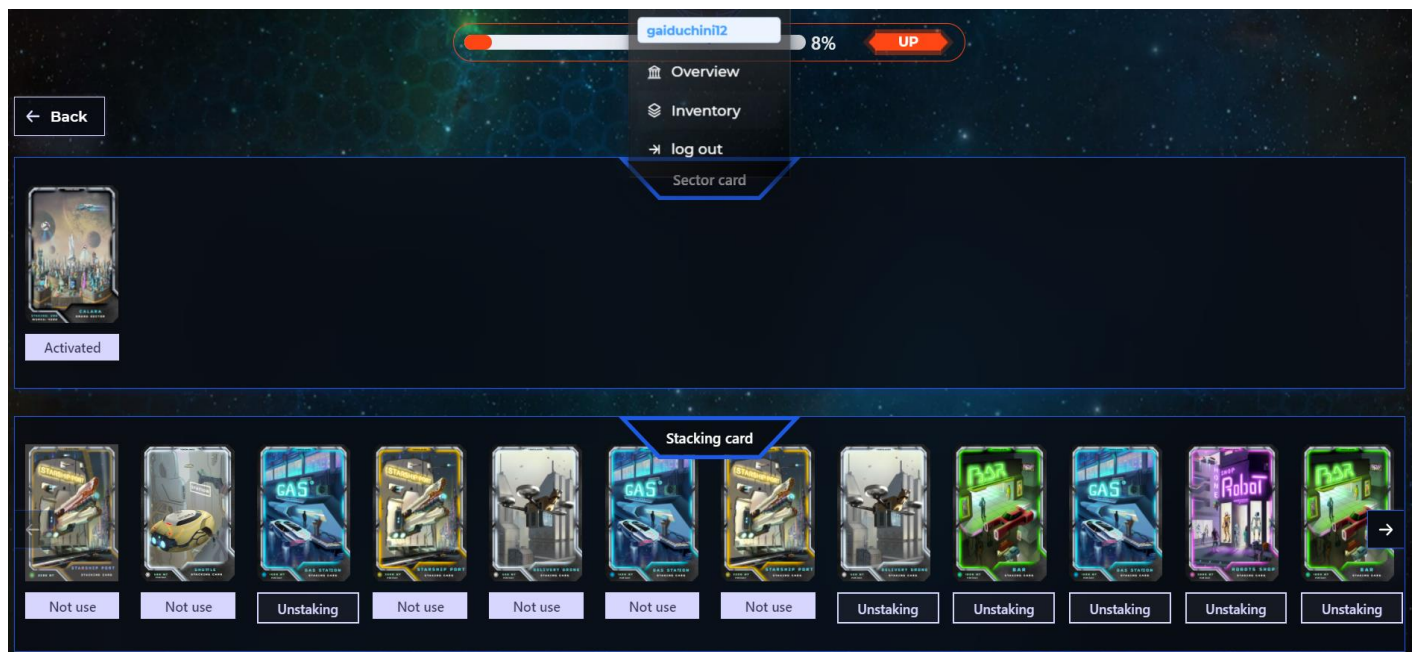

Owner of TokenLands Sector can Activated it in Inventory. Click the button under your Sector and it will be available to all users.

It will be possible to sell a sector only at the Token Lands Auction, which will be launched approximately 1-2 months after the start of the game.

Avatar – select the avatar that you want to use on your account and activate it by clicking the "Activated" button under the Avatar card

For Unstake NFT you must click the button «Unstaking» under your NFT card which you want unstake.
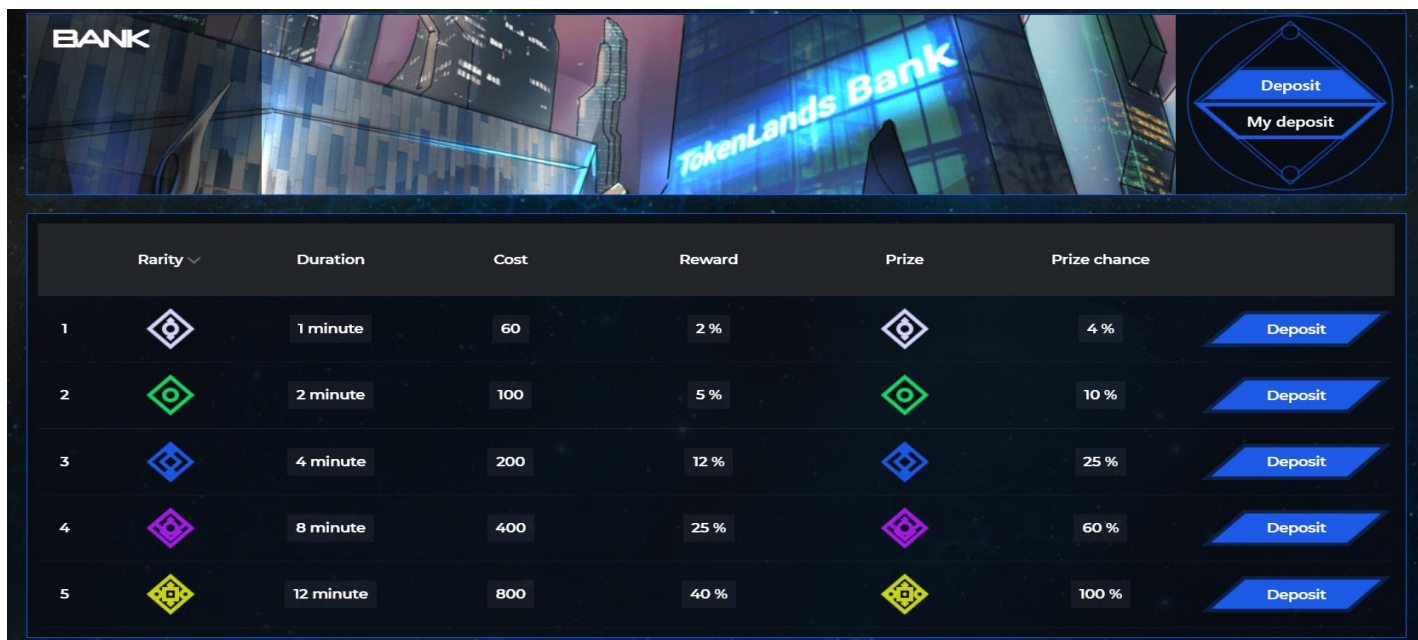

BANK FUNCTION
Go to the Bank to make deposits at favorable interest rates and get a chance to win a Bank pack with Avatars, Level-up and staking NFT cards.

Bank contract	Cost in T-coin	Prize Drop Chance %	T-coin %	Box
1 Week	50	4	2	Mini
2 Weeks	100	10	5	Small
4 Weeks	200	25	12	Big
8 Weeks	400	60	25	Mega
12 Weeks	800	100	40	Grand

	Rarity ∨	Duration	Cost	Reward	Prize	Prize chance	
1	◈	1 minute	60	2 %	◈	4 %	Deposit
2	◈	2 minute	100	5 %	◈	10 %	Deposit
3	◈	4 minute	200	12 %	◈	25 %	Deposit
4	◈	8 minute	400	25 %	◈	60 %	Deposit
5	◈	12 minute	800	40 %	◈	100 %	Deposit
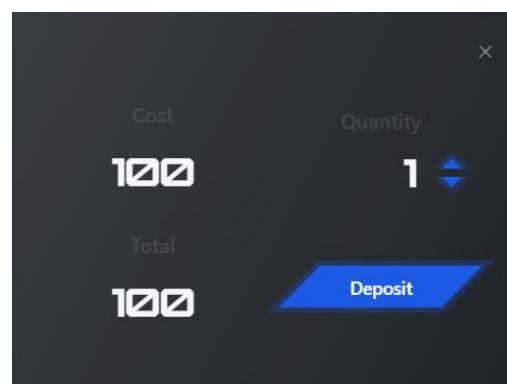

To make deposit choose you contract and click the button «Deposit».

In open window you can select how many Deposit you want to do. Confirm your choice by clicking on the button «Deposit».
There can be a maximum of 10 deposits in one contract

Then you can see information about your Deposit in «My deposit»

When the deposit expires, you can click the «Claim» button to receive your T-coins with interest, and if the chance for a Bank pack is triggered, it will be automatically drop to your wallet
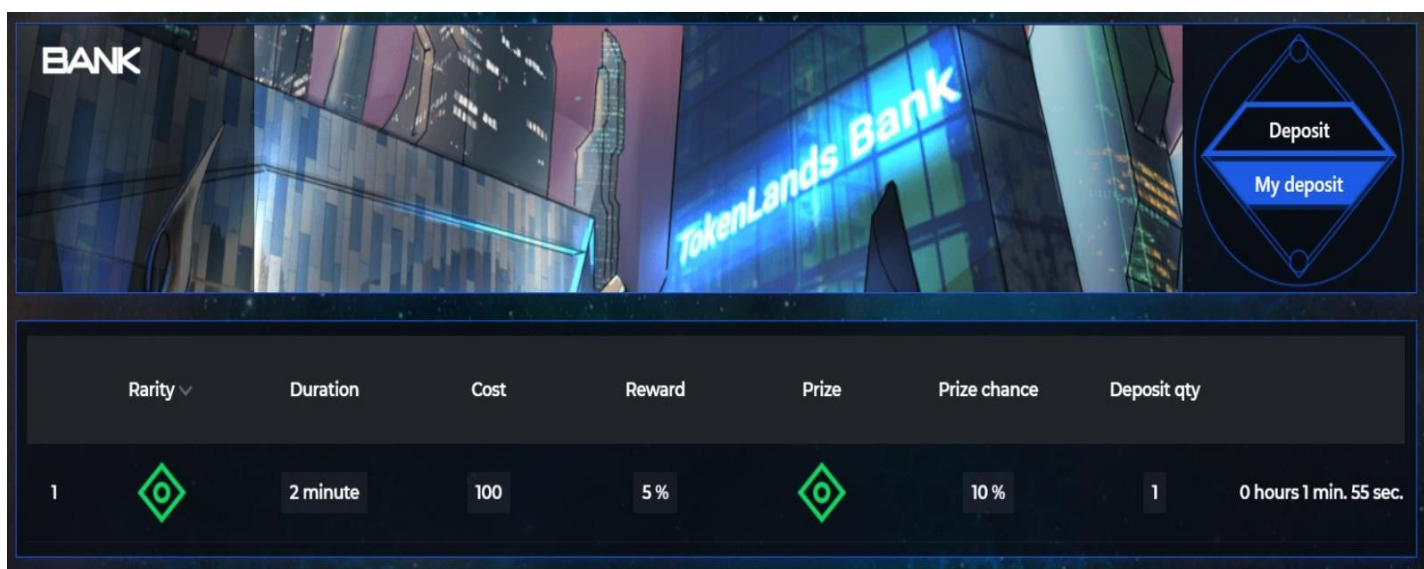

My Deposit

Legendary card	0,42

Bank grand pack	Chance %
Master (level-up)	31,25
Legendary Avatar	25
Rare card	25
Epic card	12,5
Legendary card	6,25

CRAFT

This function is designed to create mythical NFT cards. And also to combine a large number of NFT resource cards into groups of cards of different rarity.

The First mythical NFT card that can be crafted is War Factory. For crafting, you need 1500 resources (300 resources from each continent).

The War Factory will give you 50 T-Cons and a 15% chance per day to receive NFT cards from the Military Series

To craft resources of the highest rarity, you will need:

10 common resources = 1 uncommon resources
5 uncommon resources = 1 rare resources
3 rare resources = 1 epic resources
2 epic resources = 1 legendary resources

In the near future, after the start of the game, new mythical NFT cards will be added. For their crafting, not only resources will be used, but also Legendary and Epic staking NFT cards

AUCTION
This is a kind of trading platform where it will be possible to purchase NFT cards of the new series, Sectors and much more for the internal currency of TokenLands - T-coin. The starting price will be calculated based on the payback period of 10 days.

Also, the transfer of ownership of the Sector will be implemented here.

This feature will be launched within 1-2 months after the start of the game.

TokenLands Internal Currency - T-Coin

T-Coin is the gaming coin of Tokenlands. All rewards and interactions in the game will use T-coin.

The total amount of T-coins will be 10 billion. The release of T-coin at the beginning of the game will be made constantly in small parts, depending on the number of players and NFT cards used in the game. The first issue of T-Coins is 10 million. Further issue of T-Coins will be announced in all social networks of TokenLands.

To exchange T-coin for another crypto currency, a trading pair T-coin / Wax will be listing on https://alcor.exchange/

T-coin will be widely used in the gameplay, which will ensure a balanced economy and keep the value of the T-Coin high.

Burn scenarios:

– Buying NFT cards at TokenLands AUCTION

– Increase in the level of earnings

– Mining resources Fee

– Stacking T-coins to TokenLands bank

– Stacking T-coins to participate in the War of the Continents

75% of T-coins from Mine resources and Auction will be burnt or transferred back on game smart contract. Rest 25% will be sent to the development team as bonuses.

WAR OF CONTINENTS

The game will feature a war between continents, and will take place every week.The process will consist of 2 stages. At the first stage, the player chooses which continent he wants to join, makes a deposit in T-coin to the military account of the continent (the funds are returned to the player in full after the end of the second stage of the war). The deposit can be made an unlimited number of times within 6 days. After that, the 2 continents with the largest deposit will be selected, which will participate in the 2nd stage. At the second stage, the winner in the war will be determined by adding the power of all military equipment NFT cards of each player on the continent. The winning continent is endowed with increased T-coin loot from stacking and working for a week.

The concept of war is thought out in such a way that the same continent will not be able to win constantly and the players move to the continent with increased profit.

TOKENLANDS Collection

Types of NFT cards and how they will be used:

TokenLands NFT (non-fungible token) are digital collectible cards that are a unique work of art. Our game features different types of NFT cards:

SECTOR NFT CARDS:

Sector NFT cards are the most unique type of cards. They give players significant influence in TokenLands and a lot of T-Coins. The sector owners take over the stacking and working functions. The sector brings the owner 10% of everything that happens on the sector (staking and work).

Mini Sector

Small Sector

Big Sector

Mega Sector
Grand Sector

Each continent includes 5 types of sectors – Mini, Small, Big, Mega, Grand. In the table you can see all information about sectors. The max supply of each sector, the maximum number of slots for staking NFT cards and the maximum number of work that can be performed in the sector during the day.

Sectors	max supply/2000	Staking(slots)	Work (click)
Mini sector	1160	100	900
Small sector	500	125	1800
Big sector	200	150	2700
Mega sector	100	175	3600
Grand sector	40	200	4500

Sector can be activated in inventory.

Transfer of ownership of the Sectors will be implemented in Auction.

STAKING NFT CARDS:

These NFT cards are from a series of infrastructure facilities (bar, gas station, shops ...) will be used in TokenLands for the stacking function. Cards are divided into 6 types of rarity and, depending on rarity, bring different income. The sixth type of card rarity can only be obtained by combining cards of game NFT resources (Craft).

As soon as you stake your cards, you will start getting T-coins equal to the power of your cards. The power of the cards shows the number of T-coins that you can get per day.

In the table below, you can see how much staking power this or that type of card has, depending on the rarity.

All cards from a series of infrastructure facilities you can see on website - https://tokenlands.io/

Cards Rarity	Power	Cards Name
Common	5	Car Wash, Fast Food, Delyvery Dron, City shuttle
Uncommon	10	Bar, Coffee Shop
Rare	15	Gas Station, Night Club
Epic	20	Robot Shop
Legendary	25	Starship Port
Mythical	50	War Factory

Epic and Legendary cards will also be used to craft mythic NFTs

Mythical NFT cards «War Factory» has 15% chance per day to receive NFT cards from the Military Series

AVATARS NFT CARDS:

The TokenLands introduces the ability to use NFT Avatar cards. TokenLands Avatars are divided into 3 categories - Miner, Worker and Warrior. Which in turn have 4 types of rarity – Uncommon , Rare, Epic and Legendary.

The main purpose of Avatars is to increase the characteristics of your account. For use Avatar you must activated it in your Inventory.

Worker

Woker rarity	Work	Mine	War
Uncommon	20	1	10
rare	30	1	15
epic	40	1	20
legendary	50	1	25

The table shows the characteristics of the Worker Avatars that they will increase.

Work - shows by what percentage your profit will be increased when using the Work function.

Mine - shows how many resources you will receive when going to the mine

War - shows by what percentage your military strength will be increased

Miner

The table shows the characteristics of the Miner Avatars that they will increase.

Miner rarity	work	mine	war
Uncommon	5	2	5
rare	7	2	7
epic	10	2	10
legendary	12	2	12

Work - shows by what percentage your profit will be increased when using the Work function.

Mine - shows how many resources you will receive when going to the mine

War - shows by what percentage your military strength will be increased

Warrior

The table shows the characteristics of the Warrior Avatars that they will increase.

Work - shows by what percentage your profit will be increased when using the Work function.

**Mine** - shows how many resources you will receive when going to the mine

War - shows by what percentage your military strength will be increased

Warrior rarity	Work	Mine	War
Uncommon	10	1	20
rare	15	1	30
epic	20	1	40
legendary	25	1	50

Avatar cards can only be obtained at TokenLands Bank by making deposits, in Game Start Packs or on the secondary market

LEVEL-UP NFT CARDS:

Level-up NFT card designed to increase your profit from work. Level-up NFT depending on 5 types of rarity

Common Optant	Uncommon Adept	Rare Adaptant	Epic Internus	Legendary Master

increase 1%	increase 2%	increase 3%	increase 4%	increase 5%

The progress bar on main panel shows by how much your account is improved. Maximum improvement 100%. **To used Level-up NFT cards click the button «UP» on progress bar.**

Level-UP NFT cards can only be obtained at TokenLands Bank by making deposits, in Game Start Packs or on the secondary market

RESOURCE NFT CARDS

Each continent has its own unique resource, which can be obtained in the game when visiting one of the TokenLands mines. TokenLands NTF resource cards are:

CARBON	CHIP	GLASS	OIL	STEEL
Located ASUHIRI	Located CALMETIS	Located CALARA	Located IPHION	Located TRILLON

The maximum amount of resources in the mines is limited to 10,000 per day. To get resource, you need to go to the mine and pay 3 T-coins. A combination of resource cards creates a mythical NFT card. And also to combine a large number of NFT resource cards into groups of cards of different rarity.

10 common resource = 1 uncommon resource

5 uncommon resource = 1 rare resource

3 rare resource = 1 epic resource

2 epic resource = 1 legendary resource

If you go to the mine, you will not be able to work during the time allotted to visit mine - 8 hours

PACKS
